# SUPER PREMIUM

WOOD FUEL PELLETS

- 40# Bag
- 50 Bags/Pallet
- 22 - 24 pallets per truck

### Super premium fuel pellets start with better raw material

Rocky Mountain super premium wood fuel pellets utilize 100% single-species, whole-log pine fiber with no additives, because better fiber makes a better pellet. Our pellets have a low moisture content and better compression, to burn hot longer and provide better overall stove performance. With Rocky Mountain super premium wood fuel pellets, you can rest assured that you're heating with consistent, high-performance pellets—burn after burn.

### Pellet quality

When choosing fuel pellets, it's important to understand the quality of what you'll burn. Standard pellets are derived from materials that produce more residual ash—think tree bark or agricultural residues. Rocky Mountain super premium pellets are produced from debarked whole-log pine fiber. And Rocky Mountain pellets can be burned in virtually any pellet burning appliances. (Low-grade pellets must be used only in appliances designed to burn high ash content pellets.)

# SUPER PREMIUM WOOD FUEL PELLETS

### Our business is fuel pellets

Most fuel pellet manufacturers started producing pellets out of necessity, to eliminate waste. Rocky Mountain Pellet Company was founded solely to produce the best quality pellet in the industry. Through our state-of-the-art manufacturing facility in Walden, Colorado, we can produce up to 144,000 tons of wood fuel pellets annually. Rocky Mountain Pellet Company super premium pellets are found anywhere it gets cold—from Northern California to Boston—letting you heat your home with the best quality wood fuel pellet available.

### Embracing the environment

Rocky Mountain Pellet Company chose the Walden, Colorado, location to help solve the problem of more than 1.5 million acres of dead lodgepole pine trees. The infestation of Colorado forests by the mountain pine beetle created a fire hazard for landowners and impeded the forest regrowth. Rocky Mountain Pellet Company is committed to restoring this devastated land by using downfall from dead lodgepole pine trees in its manufacturing process.

Remember: When you use Rocky Mountain Pellets to heat your home or facility, you're using a true renewable fuel with a zero-carbon footprint. What's more, wood fuel pellets help reduce greenhouse gas emissions and our reliance on fossil fuel.

- Made of 100% natural pine wood fiber
- No additives
- Less than 6% moisture
- Less than .5% ash / .5% fines
- Burns at 8,000+ BTU/lb.
- Durable UV-protected bag for safe storage
- Built-in handle for easy transport
- Third-party test results on our Web site
